

# José Francisco Ruiz Zamora

Backend Software Engineer

Almería, Spain

☎ +34 633 560 772 | ✉ josefranruiz8@gmail.com | 📱 jfrz38 | 🌐 josef-ruiz

*"Backend developer focused on maintainable systems, sound architecture practices, and clean code."*

## Experience

### Inditex S.A. (via Capitole Consulting)

Remote, Spain

Backend Software Engineer

2023 - Present

- Backend development with **Java** and **Spring Boot** for the web and mobile application used by Inditex brands.
- Development and integration of backend services using **REST** and **gRPC** communication, **Kafka** messaging, and monitoring with **Prometheus** and **Grafana**.
- Participation in the architecture team, building cross-cutting services and improvements focused on maintainability, platform evolution, and developer experience.
- Technical reference within the team, reviewing PRs and API evolution to ensure alignment with quality standards, development best practices, and **maintainable architecture**.
- Development of **agents** and internal AI tools to support the team in technical analysis, code review, and development task automation.

### Hexacode S.L.

Almería, Spain

Co-founder

2021 - Present

- Co-founder of a technology startup developed alongside my main professional activity.
- Development of custom solutions with **NestJS** and **TypeScript**, applying **modular design** and maintainable code.
- Cross-functional responsibility from requirements gathering and client communication to technical decisions and product evolution.

### Several technology consulting firms

Remote, Spain

Backend Developer

2020 - 2023

- Backend development with **Java**, **Spring Boot**, and **SQL** for different clients and projects.
- Implementation of **REST APIs**, internal services, and database integrations.
- Participation in feature maintenance, incident resolution, and quality improvements.

### Michelin España y Portugal S.A.

Almería, Spain

Junior Developer

2019 - 2020

- Development of internal applications with **.NET**, **C#**, and **SQL** used by Michelin technical teams in test centers across different countries.
- Implementation of new features and maintenance of business logic.
